

1022TSH 10.1" Sunlight Readable Touchscreen with HDMI, DVI, VGA & AV Inputs

Description

Xenarc Technologies Corp. continually leads the **industrial and commercial outdoor and indoor touch screen display market** with new products, and such is the case with the introduction of a **10.1" touch screen LCD display monitor with a brightness rating of 1,200NIT**. The high brightness of this **10.1" touch screen monitor** makes it ideal for outdoor applications under **direct sunlight**, as well as any other applications where a bright, non-reflective display may be effective. This **10.1" touch screen display model** is available without Touch Screen as the 1022YH. It is also available without direct sunlight readability as the 1020TSH.

This latest touch screen display product in the **10.1" display touch screen** line offers superior readability under sunlight. With our proprietary technology, we are able to increase the brightness rating to 1,200NIT, and the Contrast Ratio to 800:1. Sunlight readability is further enhanced by its advanced Anti-Reflective coating.

Use the convenient 10.1" **touch-screen** as your input device, control your mouse cursor or the mini on screen keyboard that comes with your operating system. The **10.1" touch screen** utilizes the USB port as the interface. You can connect several of our **touch screen monitors** to your computer and the touchscreens would work simultaneously through the multi-monitor support.

The brushed, anodized aluminum face plate gives this **10" touch screen display** a modern yet elegant look and the entire enclosure is constructed with aluminum, making the unit strong and ruggedized.

Why do our **10.1" touch screens** outlast others in extreme conditions? Why do our products have a wider temperature range and a wider voltage input range? It is because our mission is to offer industrial integrators, automators and engineers the best display solutions for any situation and for any environment. By utilizing high grade components, this **10.1" LCD display** is perfect for industrial, in-car computing applications or any other applications where a small, durable, high brightness display is required, including but not limited to:

- **Transportation** - Marine, Air, Heavy Vehicles, Mining, Weigh Stations, Fleet Management, Telematics, In-Car Computing, Public Transit, Cargo
- **System Integration** - Machinery Controls, Factory Automation, Environmental Monitoring, Home Automation, Military, Smart Home
- **Point of Sale** - Hospitality, Digital Signage, Self-Service Kiosks, Outdoor Kiosks and Signage, Casino
- **Data Monitoring** - Cloud, IoT, Medical, Logistics, Inventory Management, Oil & Gas/Utilities, Law Enforcement, Broadcasting, Veterinary, First Person View
- **Broadcast & Production** - Broadcast Stations, Mobile Production Vehicles, Field Rugged Deployment for your mobile workforce, Studio Video Production
