## Description

NOTE: This 8" Monitor is now special order only. For something readily available without MOQ, please take a look at the touchscreen counterpart 802TSH.

In a follow up of the 800 series and the 805 series, Xenarc Technologies Corp. added to its 8 " line of displays with the introduction of an 8" LED LCD display with a brightness rating of 1,000NIT. The high brightness of this monitor, as well as the ruggedized aluminum casing, makes it ideal for outdoor applications. This 8" inch outdoor display unit is available with advanced Touch Screen technology
as the 802TSH.
This rugged and versatile 8" display product offers superior readability under direct sunlight. With our proprietary technology, we are able to increase the brightness rating to $1,000 \mathrm{NIT}$, and the Contrast Ratio to $500: 1$. Sunlight readability is further enhanced by it's advanced Anti-Reflective coating on the display screen.

The brushed, anodized aluminum face plate gives the 8 " inch display monitor a modern yet elegant look. The entire enclosure is constructed with aluminum, making the unit strong and ruggedized perfect for those harsh industrial factory or outdoor environments.

Why do our 8" display products outlast others at extreme environments? Why do our 8" inch display solutions have wider temperature range and wider voltage input range? It is because our mission is to offer our customers the best in display solutions. By utilizing high grade components, this $8^{\prime \prime}$ display monitor is perfect for industrial, automotive computing applications or any other applications where a small form factor, durable display is required and necessary. Our 8" LCD LED Displays are designed for applications such as but not limited to:
