This **16:9 1000 NIT High Bright Panel PC** is **IP65** and **IK08** rated and includes an optically bonded capacitive touchscreen, making it ideal for any harsh industrial environment. It utilizes Intel's **automotive and industrial grade, extended temperature E3845 Quad-Core 1.91Ghz CPU** with wide operating temperature range. The 12.1 inch touch panel is optically bonded to the LCD panel, eliminating the air gap between the two, increasing clarity, contrast, and durability. Furthermore, because this 12.1" rugged panel pc is water tight and air tight,

advanced optical bonding will not allow ambient humidity to affect the clarity or viewability. The PPC1211 12.1" rugged panel PC outperforms all other **automotive grade panel PC's** with a wider operating temperature range of **-30C ~ 85C (-22F ~ 185F)** and uses an IPS panel (In-Plane-Switching), which provides a wider viewing angle, consistent and accurate colors from all viewing angles, clearer images, and stable response times. A **high contrast ratio of 1000:1** provides crisper images and vivid colors, even in direct sunlight.

The PPC1211 was designed for those looking for a rugged, bright, all-in-one panel PC, usable in just about any environment or application.

The versatility of the PPC1211 extends beyond its usability in many different environments. With the included waterproof cables, the PPC1211 is IP65 on all sides. The casing of the PPC1211 is designed to be used as a stand-alone panel PC as well as a panel mounted PC. VESA standard mounting holes on the back further provide users with a variety of mounting options. The IK08 rating makes the PPC1211 vandal resistant and shock resistant.
